One of the most popular digital currencies to emerge in the last few years has been Bitcoin. As it stands, Bitcoin is by far the largest cryptocurrency in terms of both market cap and circulation. Since its initial announcement, Bitcoin has attracted a lot of attention. The cryptocurrency has become a real household name, and the average person has an idea about what Bitcoin is. Yet, despite its notoriety, Bitcoin has become a global topic of interest for a number of reasons. For one, Bitcoin has a decentralized nature and can only be created through a complex process known as mining. Bitcoin mining has become a very lucrative and in-demand service, especially for GPU mining rigs. The reason that people are even mining Bitcoin is because its price has skyrocketed over the past few years. With each Bitcoin passing hands, a lot of people decide to get in 82157476af
