About This Content

What do I get as an R2G Supporter Today?

- ♥ Your name featured in the credits (with the next update of the game)
- ♥ You will be taking advantage of the **discounted price**. We want to reward supporters who are with us from the very beginning and we will be increasing the price of the package with every new game released.
- ♥ Endless love of the entire **Thing Trunk** team

What will I get in the future?

- 💎 All future R2G games released in the series

◆ **All additional premium content** ever created for any of the games (such as DLC's, digital collector's content like artbooks, soundtracks, etc.)

◆ **Access to preview builds** of the upcoming games before they are released to the public (even before early access)

How long will it take?

Now that's a really tough question. We'd love to release a new game every two years, and we'll strive to do so, but this is something we can't guarantee. We're a very small independent team and the development of the first game, Book of Demons, has already taken much longer than we anticipated. And it's still not 100% complete. We should be able to make following games faster as a lot of the groundwork has already been done while developing Book of Demons; we have the art style, the common R2G launcher, a working pipeline backend tools, for some of the upcoming games we even have already created the animated intro sequences. Since we are self-funded, it will also depend on the level of commercial success Book of Demons achieves once it's released. If it performs well, we should be able to scale our team and work faster. It's not that great it might make bigger business sense for us to port it to other platforms first.

Either way, this will be a long ride, so please make sure this is something you are comfortable with before deciding to support us.

What about other platforms?

Return 2 Games Supporter's Pack is for Steam supported platforms only. This means PC, Mac (and possibly Linux) builds of the future games. It's technically not possible for us to sell bundled licenses for other proprietary platforms (like mobile or consoles) so these will be distributed separately should they arrive.

What happens if you fail?

Another tough one. We'd like to write that failure is not an option, but let's be real – this is not the case, especially with such an ambitious task at hand. Failure is something we'll try to avoid at any cost and we'll take any route that will help us realize the R2G vision. Still, if the games flop and we go down midway, we might not be able to give refunds. We might fail in a way, that it will take forever to complete the series. There's a few more scenarios we'd consider a failure, but if there is one thing we can promise it's this - **we'll do everything in our power not to stumble**. The biggest risk lies just ahead with the release of Book of Demons, but so far judging by the early reviews we're cautiously optimistic.

How can I help more?

If you support our vision and you'd like to help us even more (apart from purchasing the R2G Supporter's Bundle) below are some things you might do. We feel pretty comfortable developing games, but we suck at marketing, so it would really mean a lot to us if you could:

- Spread the word about Book of Demons and R2G series among your friends
- Review us on Steam
- Follow "Thing Trunk" on Facebook, Twitter and YouTube

-
- Subscribe to the newsletter on our website

What if I still have questions?

If you still have questions, contact us (you can find a contact form on our website) and we'll try to clear everything up.

Title: Return 2 Games Supporter's Pack

This application has a lot of potential to be a great cinema VR experience with the power of Plex Media Server behind it. I would like to see the developer collaborate along side the community with a few features later; after the items already in progress get pushed through.

Some improvements for the experience that could work; such as custom room skins, as well as the digital clock, the chair... just for fun. Things like a park with an inflatable screen, lawn chairs, a cinema theater auditorium. The clock; things such as changing the color, or size of the display.

Great starting point though. I will continue to use this a lot for my 3D films for sure.

I would recommend this software for those who want the experience this offers, it's still quite early in development so it can only get better with your suggestions and feedback here. What it brings to VR, and the upcoming planned improvements from the developer to come.. Gorgeous art, great voice acting, plays like a dream. Sometimes cutscenes freeze while the voice acting and subtitles keep going, but good otherwise.. Fun inexpensive game. Blowing stuff up is always enjoyable :). The open mic integration is astounding. As of now, there are very few players, so expect to get a lot of #1 leaderboard rankings for more obscure titles.

Seems a lot more challenging than Beat Hazard Ultra, IMO. Not in a bad way. Just something worth noting.

That being said, outside of open mic integration, really not worth the purchase if you have Beat Hazard Ultra. It's more or less the same game, with larger "bosses." I hope to see this develop some more mechanics in the future. As of now, I like it, but I wouldn't necessarily recommend it.

. I buy it and now the game is broken -_- i am so sad i cant stand it .

high difficult level. A sensible way to increase the game's longevity. Fewer quests requiring high difficulty runs would have been nice, considering how hard it was to get geared for them in Vermintide 1.. i have no idea how the rating of this game went to 70% positive over the last year but its suspicious AF. game has been dead since mid 2016. absolutely no reason to buy it. cash grab that steam has allowed for years for whatever reason. game itself was pretty great but was abandoned by the devs in less than a year. save your money. shop elsewhere.. Fun little timewaster if you have an hour or so to kill. Might get boring after a while, but so does tetris. For the general audience, it's alright. Maybe this would work nicely as an IOS or android app.

...now for Stoners, fans of psychedelic art, or a big fan of music that sounds like Boards of Canada? game becomes an addiction, send help. Please.. just purchased this Awesome retro style shoot em up i am very impressed, I love the originality with the warp a unique way to destroy your enemies and escape at he same time, amazing Boss fights, cool upgradeable weapons & allsorts. I highly recommend buying this game if you are a fan of the shoot em up genre, well worth purchasing :) excellent work guys (Astro Port) :). Tron like, I "played" first 15 minutes without any gameplay whatsoever. Pacing is way off.. About an hour in and already sucked into the story and the interface. Fun card battles with seemingly endless possibilities. Very happy with this De'Vine The Card Battles and will be telling my friends. Good work! Excited to continue playing! Also a great follow up game to De'Vine: World of Shadows. Can't go wrong for \$3.99. Highly recommend!. Truly an amazing game! Epic story, awesome combat makes you feel badass, great graphics and interesting puzzles.

10V10. An excellent educational potential for kids. I mean, who hasn't dreamed of being an astronaut??
9.5V10
